SMART GRID EDITION

Electricity Distribution & Smart Grid

> *The network as switched, the data as measured, the bill as explained.*

For electricity distributors, embedded networks and utilities. The network and its switch states, outages and restoration options, field work, smart-meter interval data and quality, plant tags, tariffs with time-of-use blocks and standing charges, customer accounts and bills that explain themselves — with a customer app.

WHAT IT RUNS

- Network points, circuits, switches and feeders — the network as switched today
- Outages, who is affected and the restoration options
- Field work and field response
- Meters, interval reads, point reads and meter-data quality
- Tariff book, time-of-use calendar, allowances and bills
- Where every unit went — the bill line by line

THE APPS

Staff system
for control room, metering, field, tariff, planning
the network operations centre

Customer app
for customers
outages, their bills, their usage explained — and send a meter reading

WHO SIGNS IN

Control · Metering · Field · Tariff · Planning

STANDARD IN EVERY EDITION

One set of books
Ledger, cashbook, sales, purchases and assets — shared by all

Every view audited
Who saw what, and when, on every record

Signatures & retention
Electronic signatures, records retention and legal holds

The AI Clean Gate
Every photo and post checked before anyone sees it

Messages & notices
Feed, calendar, two-way messages and self-registration

> "The customer's bill explains itself — which block, which rate, which allowance.
